

The following three climbs are on the down-hill, steep face of Wrinkle Rock, the crag the gondola passes over near the upper station.

1. Dyke on Earth (5.11a)

Follow the dyke leftward to an airy finish.

Rack: bolts, gear

2. Gone Delerious (5.11b)

Bolt protected climbing leads to a right-facing corner. Place gear as you move up through the roofs. Move left and then right to finish.

Rack: bolts, gear

3. Wrinkles Crinkle (5.10c)

Climb past a bolt to reach a crack that widens to 5". The gear is good and the crack is not uniform so it accepts a variety of sizes.

Rack: bolts, gear (1 x 4.5" and 1 x 5" cam)
